Post-Workout Perfection

ISO-ology is engineered to be the perfect post-workout protein because of its double-dose of leucine and its rapid absorption. After an intense workout there's a critical 45 minute window of opportunity available in which to consume nutrients vital for maximum recovery and optimum strength gains. Once ingested, ISO-ology's free-form leucine first kicks in and begins stimulating muscle repair. Then within only 30 minutes your body digests the rest of ISO-ology, triggering all of the crucial muscle building processes that make this the ultimate post-workout protein!

Double the Leucine for Double the Muscle

Leucine is the single most important amino acid for muscle synthesis and accelerated recovery. Gram for gram & scoop for scoop, ISO-ology has twice as much leucine compared to other whey powders, which may amplify new muscle growth by two-fold or even more (see chart).^{2,3} Why is leucine so important? Physiologists and nutritionists have pinpointed leucine as directly responsible for triggering the mTOR muscle synthesis cascade and signalling all muscle cells to begin absorbing protein and other nutrients required for repair & growth.

Clean Label: No Proprietary Blend

Many companies tout the inclusion of additional BCAAs in their proteins, yet they intentionally obscure the minimal dosages in a deceiving "proprietary blend." There is, however, a simple test to check if you are receiving an efficacious amount of additional amino acids: Can you visually see the added leucine & BCAAs? Free-form leucine always appears as shiny, highly visible specks, especially in darker-colored and chocolate-flavored proteins. Simply put, if you cannot see the added leucine there's not enough for it to make a difference in your performance.

We also only use premium vegetable-derived L-Leucine as opposed to the more common and inferior grades produced from animal feathers and other animal byproducts.

Leucine's Effect On Muscle Protein Synthesis^{2,3}

Branched-Chain Amino Acid Profile

	1 scoop	2 scoops
Leucine	5000mg	10,000mg
Isoleucine	1600mg	3200mg
Valine	1400mg	2800mg
Total	8000mg	16,000mg

"It's hard to believe something so decadent and delicious can be GOOD for you. I don't even know how to describe it? Luscious? Delicious? Rich? It's not overly sweet either, which I like. It's perfect."
