SLIN is the result of countless hours of deep research, trial and error using the most cutting edge insulin sensitizers in the industry. It was designed SPECIFICALLY for those interested in peak performance and hungry for the next game changing supplement. Other products on the market have misinterpreted the data and are using dosages and ingredients for average individuals, NOT those looking to build muscle and burn fat. The dosage of each ingredient for SLIN was rigorously calculated giving you the most cutting edge, results driven nutrient partitioner available today.
