TRULY NATURAL* VITAMIN C provides naturally-occurring and highly-bioavailable non-toxic vitamin C from a whole-food water extract of acerola cherry. Native to South and Central America, acerola is one of the highest natural sources of vitamin C on the planet. Food sources of vitamin C are the most bioavailable and compatible to the living matrix of the human body and far superior to isolated vitamin C. Vitamin C never occurs as an isolate in Nature. It occurs as part of an entire vitamin C complex, which includes other important cofactors that assist the body with proper absorption. Trust in Nature's wisdom! Color and density may vary because acerola cherry harvests are subject to seasonal fluctuation.

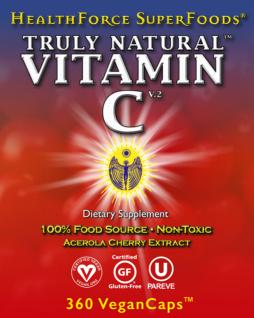

HealthForce SuperFoods® is a grassroots, independently owned and operated whole food botanical company. We offer a diverse and truly effective product line inspired by the incredible symbiotic power of plants. Our mission is fueled by a passion for purity and heart-centered collaboration, with a strong foundation of service and integrity. We are proud to offer clean, ethically

produced products designed to help you thrive in a modern world.

"I WISH YOU GREAT HEALTH AND HAPPINESS ALWAYS!"

Dr. Jameth Sheridan – Naturopath and Hard-Core Herbal Medicine Researcher
