

Blue Light Shield & Evening Focus

Our eyes are the starting point for the majority of the information we process. To sharpen our vision, the better. The bright lights and beautiful images we see interpret are worth far more than a thousand words. But, what if the signals that fuel our minds with information are also simultaneously destroying wires and disrupting our ability to get deep, restful sleep? In today's world we are surrounded by blue light-emitting screens and displays. While they do no damage during the day, their effects are particularly damaging at night. Ambrosia Night Owl is formulated as the first all-natural supplement to truly and meaningfully address the health of our eyes. Utilizing Lutein 2020[†] as a natural blue light shield, and a precise, clinical combination of Magtein[™] for Magnesium and Suntheanine[®] to optimize brain performance and recovery. Ambrosia Night Owl is a must for anyone requiring the most from both their eyes and brain in this digital age.[†]

WARNING: This product is only intended to be consumed by healthy adults 18 years of age or older. Pregnant or nursing women should not use this product. Consult with your health care provider before using this product, especially if you are taking any prescription, over-the-counter medication, dietary supplement product or if you have any pre-existing medical condition.
