

Hi-Tech Pharmaceuticals multi-faceted Ashwagandha extract product combines the top 3 brands into one Full Potency Herbal extract. 1) Sensoril® Ashwagandha extract supports a range of healthy functions. Sensoril® is made from both the root and leaf and is standardized to 32% oligosaccharides and 10% withanolide glycoside conjugates. 2) KSM-66 is the highest-concentration extract on the world market today that is drawn using only the roots of the ashwagandha plant. 3) AshwaPure® Ashwagandha specifically has been studied for its effectiveness in supporting cortisol levels and normalizing stress, promoting immune health, elevating mood and enhancing athletic performance. Hi-Tech developed through a unique process that integrates the ideologies of multiple standardized technology and the benefit of the full spectrum that ashwagandha has to offer. To ensure consistent and reliable phytonutrient levels, we isolate a controlled amount of these important active plant compounds. Then, we blend these enhanced, "standardized" compounds that results in a potent, premium-quality standardized herbal extract with all of the synergistic and beneficial qualities found in ashwagandha to support memory, cognition, stress response and overall well-being.†

Sensoril® is protected under US Patent Nos. 6,153,198 and 6,713,092 and is a registered trademark of Natreon, Inc.
