

What are Ionic Minerals?

Getting Minerals in an ionized is how plants and animals were designed to absorb inorganic minerals from the dirt. Plants are like sprouting little factories making their own food by taking inorganic minerals in through their roots and converting the minerals into an organic, ionized form - the form your body absorbs the best.*

Good State Ionic Minerals have been known for their high bioavailability rate while others can be extremely low. Minerals can be described in Picometer, Nanometer or Angstrom in size.

Recommended Dosage: Adults: 10ml (2 caps) daily in water or juice as maintenance once per day. Use more if needed or as recommended by your Health Care Professional.

Caution: Keep out of reach of children. Always speak with your physician before using any dietary supplement. Do not use if safety seal is damaged or missing.

Contains **NO** sugars, soy, dairy, fish, gluten, starch, artificial flavors, GMO, colors, animal by-products and is hypoallergenic. Suitable for vegetarians. For freshness, keep refrigerated after opening.
