

Minerals are important constituents of any healthy diet. But today's farming methods often strip the essential minerals from the soil. This supplement is a good source of the Zinc you need everyday for health.† Zinc is designed to support the body's natural defense system as well as enhance digestion and metabolism of important vitamins, minerals, carbohydrates and other essential nutrients. Zinc is also essential for normal fetal and reproductive development. Zinc is an antioxidant that provides immune support and plays a role in over 300 enzymes in the body.† It assists in the formation of DNA, the cell's genetic material, and is essential for cell division and growth.† Zinc is involved in healthy vision and smell.† Zinc offers additional benefits as it assists in the proper functioning of the hormone insulin.†
