The liver is the largest and most complex organ in the body. It plays an essential role in both assimilation of nutrients and elimination of toxins. Maintaining a healthy liver function is crucial for thriving in the modern world. Liver Rescue is a combination of four important herbs that have traditionally been used for centuries to support healthy liver function in those with a healthy liver*: milk thistle seed (*Silybum marianum*), dandelion root (*Taraxacum officinale*), chanca piedra (*Phyllanthus niruri*), and turmeric root (*Curcuma longa*). Free of fillers, binders, flow agents, and chemical solvents.
