

Why Full Spectrum Digestive Support?

The truth is, symptoms like heartburn, indigestion, and reflux aren't usually from too much acid but from too little.* The valve to the stomach requires very low pH environment to function.* With weak acid it doesn't close and stomach juices can move up into the esophagus causing burning, irritation, sore throat, and other discomfort.*

In high pH, digestive enzymes cease functioning and food is not fully digested.* The body no longer receives the nutrition it needs – especially protein and minerals.* The undigested food then passes into the colon where it ferments, causing gas, bloating, and digestive imbalances in a chain reaction.*

Full Spectrum Digestive Support has the acid you need to lower stomach pH and bring your digestion back into balance.* It includes pancreatin, a powerful complex of digestive enzymes from the pancreas with everything you need to digest food properly, plus pepsin, a critical enzyme for digesting protein.* Get your digestion, and your health, back on track with Full Spectrum Digestive Support.*

Full Spectrum Digestive Support contains none of the following: Gluten, Soy, Egg or Dairy
