

Vital C-LD® is a superior supplement for immune resiliency. State-of-the-art biotechnology helps prolong the biological activity and antioxidant capacity of this essential vitamin. Vitamin C-dependent metabolic reactions within the body are targeted for optimal health and physiological homeostasis.

Vital C-LD® is a proprietary preparation of ascorbic acid with citrus bioflavonoids, rosehips and lipid metabolites from natural vegetable sources. This form of liposomal delivery (LD) increases bioavailability up to 1500% more than non-liposomal vitamin C. Vital C-LD® travels intact through the stomach and into the intestines where lipid metabolites enhance cellular absorption.†

Vital C-LD® provides more of the vitamin C you need without the G.I. irritation.
