

401258-1W44

To assure optimal extraction of Black Cohosh's isoflavones & other bioactive compounds, the rhizome & rootlets are hand-dug only in late autumn or early spring, are carefully shade-dried, and are then thoroughly extracted.

We prepare our Black Cohosh Extract from the rhizome & rootlets of *Cimicifuga racemosa* plants which are Certified Organically Grown especially for us in their native forest habitat in eastern Kentucky.
