We prepare our Bloodroot Extract from the rhizome of *Sanguinaria canadensis* plants which are **Certified Organically Grown** in their native forest habitat in eastern Kentucky. To assure optimal extraction of Bloodroot's bioactive compounds, the rhizome is hand-harvested in late summer or early autumn, is carefully shade-dried, and is then thoroughly extracted.

400

LIQUID HERBAL EXTRACT

BLOODROOT

Sanguinaria canadensis
Whole Rhizome

HERBAL SUPPLEMENT

1 fluid ounce (29.6 ml)
