

## About Liver Support System™

The liver-protective phytochemicals in common milk thistle extracts are very poorly absorbed into the bloodstream. Studies show that binding silybin to phospholipids increases absorption by up to 800%, thus assuring maximum delivery. N-Acetyl-Cysteine and alpha lipoic acid are added to boost the L-Glutathione the liver uses for detoxification. Artichoke, Schizandra and other herbs support the flow of energy and blood in and through the liver. In short, Liver Support System™ supports the liver as no other supplement can.\*

Liver Support System™ does not contain artificial colorings or flavorings, GMOs, sugar, dairy, gluten, or wheat, and is suitable for vegetarians.
