Coenzyme Q10 (CoQ10) is a vitamin-like compound that plays

a central role in cellular energy production.* CoQ10 is found

throughout the body, but is especially concentrated in the

heart, liver, and kidney and production has been found to de-

cline with age. CoQ10 works as a potent free radical scavenger

in cell membranes, as well as within blood vessels.* Years of sci-

entific research have shown that CoQ10 helps to maintain a

healthy heart and vascular system.*
