PEEL HERE FOR REBATE

V.1.926.0411US.C

ONCE YOU TRY IT, YOU WILL NEVER TRAIN WITHOUT IT!®

WHILE MIXING N.O.-XPLODE™ DO NOT SHAKE! STIR POWDER WITH UTENSIL.

Stack with NITRIX®, CELLMASS®, AXIS-HT™, SYNTHA-6™ and TRUE-MASS® for maximum physique and performance impact.*

DESIGNED FOR: Healthy adults 18-50 years of age seeking to support energy, performance, and muscle development during resistance exercise or other forms of fitness training.*

RECOMMENDED USE TO ASSESS YOUR TOLERANCE: As a dietary supplement, begin by consuming 1 scoop of N.O.-XPLODE™ mixed with 5-6 oz of cold water. Vary the amount of water to achieve your desired flavor and sweetness level. Wait 30 minutes to assess your tolerance. If appropriate, after 30 minutes consume an additional 1 scoop mixed with 5-6 oz of cold water and assess your tolerance again.

RECOMMENDED USE ON TRAINING DAYS: Once your tolerance has been assessed, mix 1-2 scoops with 5-12 oz of cold water and consume 30-45 minutes before training. If desired, for maximum effect use a third scoop at least 3 hours after using the initial 2 scoops. Do not take more than 2 scoops at a time and do not exceed 3 scoops in one day. Use approximately 5-6 oz of water per 1 scoop of powder. Again, vary the amount of water to achieve your desired flavor and sweetness level. To achieve maximum results take on an empty stomach (i.e. at least 2 hours after a meal or 1 hour after drinking a protein shake).

NON-TRAINING DAYS: Mix 1 scoop with 5-6 oz cold water and consume on an empty stomach.

Total caffeine from all sources is approximately 200mg per serving, which is equivalent to two cups of coffee.
