

Promend™

Promend™ Daily Immune Probiotic is the natural way to build and maintain optimal digestive and immune health. Promend™ features three potent, clinically researched probiotics for a triple action that simply can't be matched by the leading single-strain supplements.†

Probiotics are "friendly" bacteria that live in your intestinal tract, where they perform important functions for balancing digestive and immune health. Unfortunately, probiotic levels can be depleted by diet, age, stress, and medications. That can lead to digestive imbalance, and can have negative effects on immune function.

The good news is that now, you can restore balance to your system with just one daily capsule of Promend™. Specially formulated for stability, there's no refrigeration required. 100% vegan and dairy-free, Promend™ features an advanced targeted-release capsule technology that protects the probiotics from stomach acid, delivering them to the intestinal tract where they are needed. Get a healthy boost of beneficial bacteria every day, with triple-action Promend™!†
