Ingredients: IntraPro AAC6™ High Nitrogen Protein Blend (Ultra Filtered Whey Protein Isolate, L-Leucine, L-Glutamine, L-Taurine, L-Isoleucine, L-Valine), Dutch Process Cocoa, Lipid Complex (Sunflower Oil, Maltodextrin, Flax Seed Oil, Sodium Caseinate, Mono and Diglycerides, Mono Esters), Controlled Dispersion Complex (Xanthan Gum, Cellulose Gum, Carrageenan), Natural and Artificial Flavours, Silicon Dioxide (Flow Agent), Salt, Sucralose, Acesulfame Potassium.

Recommended Use: Depending on your individual protein needs, mix 1 to 3 scoops of IntraPro with 6 to 18 oz of cold water in a shaker or blender, or simply stir into water with a spoon. For maximum results, drink IntraPro 2 times a day.

Allergen Warning: Contains ingredients from milk. Made in a plant that also processes egg, soy, peanut, tree nut, fish, crustaceans and shellfish, and wheat products.

Store in a cool, dry place.

KEEP OUT OF REACH OF CHILDREN.

WARNING: Consult your health care professional prior to use if you have, or suspect, a medical condition, are taking prescription drugs, or are pregnant or lactating. Use this product as a food supplement only. Do not use for weight reduction.

NEW PURE WHEY PROTEIN ISOLATE FORMULA

Designed to satisfy the demands of the competitive bodybuilding community everywhere, new IntraPro™ gives experienced bodybuilders what they have so long desired; the first ultra-high quality, competition strength, **whey protein isolate** supplement engineered specifically for the educated athlete's protein needs.[†]

The IntraPro™ **Competition Advantage™** contains the kind of high quality nutrition bodybuilders require to aid in muscle growth with a macronutrient profile designed for athletes whose goals are to achieve and maintain significantly lower levels of body fat.[†]

At 25 grams of protein per serving, IntraPro draws its significant nitrogen retentive capabilities from the complex anabolic/ anti-catabolic power of IntraPro AAC6™, a unique combination of pure professional grade cross flow micro and ultra-filtered whey protein isolate enhanced with a high yield amino acid complex containing optimal ratios of the branched chain amino acids L-Leucine, L-Isoleucine and L-Valine with precise amounts of L-Glutamine and Taurine for inhibiting muscle breakdown and promoting maximum

muscle cell volumization.[†] If that's not enough, IntraPro contains a controlled dispersion complex designed to help sustain the release of notoriously fast absorbing whey proteins to help maintain positive nitrogen levels longer than the typical 2-hour window elicited when ingesting whey protein isolates. IntraPro is designed specifically for intelligent bodybuilders whose meals are consumed at normal 2-1/2 to 3 hour intervals. These athletes need to count on "no downtime" between meals when it comes to feeding precious muscle tissue.[†]

When going to every extreme to create the highest quality competitor's WPI supplement in existence, you have to go to equal extremes when developing the taste and texture. In medical terms it is referred to as "compliance factor," put simply, the better it tastes, the more you will use it. The superior flavor technology behind this super nutrient formula ensures that you will look forward to drinking new IntraPro™ every time.[†]

IntraPro Whey Protein Isolate by Gaspari Nutrition; addressing the needs of experienced bodybuilders and serious athletes desiring to achieve maximum results and peak condition in any season.[†]
