

healthy bones*

Collagen is a complex structural protein that maintains strength and flexibility throughout the body. As we age, collagen depletion can lead to common signs of aging in the skin, hair, nails, muscles, tendons, ligaments, and bones.

Clinical studies show that taking collagen can promote healthy collagen formation throughout the body*. Super Collagen™ uses an advanced enzymatic hydrolyzation process to convert large collagen molecules into small peptides that are bioactive in the body.*

SUGGESTED USE: Take 1 scoop (about 7.6 grams) daily, dissolved into a glass of water or orange juice. For best results, take on an empty stomach.
