

How It Works: Alcohol Defense is designed to speed up the metabolism of alcohol and its damaging metabolites. It contains dihydromyricetin, which reduces alcohol's intoxicating effects. Alcohol Defense should be taken **AFTER** drinking with a large glass of water. **DO NOT** take Alcohol Defense before drinking, or it may interfere with your ability to feel the effects of alcohol. Alcohol Defense is **NOT** a replacement for water, and should **NOT** be used to consume more alcohol than you normally would. Always stay hydrated and consume alcohol in moderation. Please drink responsibly.*

Disclaimer: Keep out of reach of children. Do not take this or any other supplement if under the age of 18, pregnant or nursing a baby, or if you have any known or suspected medical conditions, and/or taking prescription drug(s) or OTC medication(s).
