

CONTAINS NO artificial colors, flavors or preservatives; no wheat, gluten, milk, eggs, peanuts, tree nuts, soy, crustacean shellfish or fish.

Minerals play important roles in the body by helping to build strong bones and teeth, regulate cell and enzyme tasks, and balance fluid and nerve functions. Meeting daily calcium requirements is important to assist these duties, as is obtaining an adequate supply of magnesium. Zinc adds further support in its vital role for growth and development. Our **Liquid Cal Mag Zinc & D3** product supports these functions by providing the key nutrients especially important for bone development. Best of all, it comes in a great-tasting liquid form.[†]
