

Certified Organic Greens is a food supplement providing nutrients straight from planet earth. This vegan, naturally sourced blend of two powerhouse grasses promotes optimal health by supplying a source of chlorophyll not often consumed in the daily diet. Chlorophyll has been shown in research to bind carcinogens and remove them from the body. Our USDA-Certified Organic product, containing vitamins A, C, and K, folic acid, minerals such as calcium and iron, chlorophyll, and carotenoids, uses only USA-grown wheat and barley grasses and provides a pure and convenient way to get your greens!†
