V2

SUGGESTED USAGE: As a dietary supplement, take 1 capsule 1 to 4 times daily.

HOW IT WORKS: Chlorophyll is the pigment that plants use to trap light needed for photosynthesis; it is what gives plants and algae their green color. Some reports indicate that Chlorophyll supplements can act as an internal deodorant.* Scientific studies show that chlorophyll may help to support healthy cellular reproduction cycles and liver function, and can help to encourage proper detoxification mechanisms.* Alfalfa is included in this product as an additional source of chlorophyll, as well as a naturally occurring source of Vitamin K.

CAUTIONS/INTERACTIONS: Alfalfa may theoretically interact with immunosuppressants, medications that induce photosensitivity, and estrogens. In addition, Alfalfa has naturally occurring Vitamin K and therefore, may interact with warfarin. If you are immunocompromised, taking immunosuppressant medications, drugs that induce photosensitivity, estrogens, or warfarin, consult your healthcare practitioner before taking this product. When taken orally, chlorophyll may cause green discoloration of urine or feces, or yellow or black discoloration of the tongue. There have also been occasional reports of diarrhea related to oral chlorophyll use. For more information on this product go to www.protocol-for-life.com/P2645

PROTOCOL
FOR LIFE BALANCE®

Chlorophyll

100 mg

- Internal Freshener*
- Supports Healthy Detoxification*

90 Capsules

A Dietary Supplement
