

Although healthy weight loss cannot be achieved by simply taking a pill, supplements can provide needed support for a weight loss or weight management program. Our **Kelp-Vinegar-Lecithin-B6** supplement, more commonly referred to as KVLB, assists the body when dieting. The nutrients in kelp support the thyroid. Vinegar is believed to support fat burning activity, while lecithin helps emulsify fat. Vitamin B6 naturally supports water balance, and is a vitamin often deficient while dieting.[†]
