

**SUGGESTED USAGE:** As a dietary supplement, take 1 capsule 1-2 times daily, or as directed by your health-care practitioner.

**HOW IT WORKS:** Like Resveratrol, Pterostilbene belongs to a class of polyphenols called stilbenes that are naturally produced by plants in response to stress. Although these two stilbenes have similar properties, Pterostilbene's methoxylated structure allows for enhanced absorption and metabolic stability.\* Emerging research suggests that Pterostilbene may support cardiovascular health, may help to maintain proper cell cycle regulation, and can promote a healthy response to cellular stress.\* This formula combines pTeroPure® *trans*-Pterostilbene with *trans*-Resveratrol, creating a powerful, more comprehensive, free radical scavenging, anti-aging combination.\*

**CAUTIONS/INTERACTIONS:** If you are taking carbamazepine or other anticonvulsant medications, consult your healthcare practitioner before taking this product. This product may cause digestive upset in some sensitive individuals. For more information on this product go to [www.protocolforlife.com/P3357](http://www.protocolforlife.com/P3357)
