

SUGGESTED USAGE: As a dietary supplement, take 1 capsule daily with a meal.

HOW IT WORKS: Green Tea has been extensively studied. Researchers have found its active constituents to be a family of polyphenols called catechins. One catechin in particular, epigallocatechin-3-gallate (EGCg) has demonstrated extraordinary free radical quenching power in laboratory studies.* One capsule of Protocol For Life Balance® EGCg, 200 mg, possesses the phytonutrient content equal to about 2-3 cups of green tea.*

CAUTIONS/INTERACTIONS: Do not take this product on an empty stomach; do not exceed recommended dose. Anticoagulant medications and beta-lactam antibiotics may interact with Green Tea Extracts (GTE). GTE may also decrease absorption of iron and folic acid. For adults only. Take with food. Consult physician if pregnant/nursing, taking medication, or if you have liver disease or any other medical condition. Keep out of reach of children.
