

SUGGESTED USAGE: As a dietary supplement, mix 2 level scoops (50 g) into 10-12 oz. of water, juice, or other liquid, or as directed by your healthcare practitioner. To be used as part of a short term detoxification program.

HOW IT WORKS: ProtoClear™ is a protein-based nutritional supplement utilizing a vegetarian Non-GMO Pea Protein designed for use in conjunction with a comprehensive detoxification program as the cornerstone of an elimination diet. ProtoClear™ has vitamins, minerals and other nutrients that support Phase I and Phase II detoxification, as well as a blend of nutrients that help to protect against the free radicals generated during the detoxification process.* ProtoClear™ includes selected B vitamins in their biologically active forms, which can be readily used by the cells of the body, needing no conversion by the liver. ProtoClear™ also has Apple Pectin, a naturally sourced ingredient that further aid detoxification.* Medium chain triglycerides (MCTs) have been included as a healthy source of fat that is readily absorbed and utilized as energy by the body.* Care has been taken to select ingredients that are typically nonreactive in most individuals. ProtoClear™'s balanced proportions of protein, carbohydrate, and fats help to sustain energy levels during a detoxification program.*
