

Kamut Wheatgrass Juice Powder uses the highest quality growing and processing methods. Wheat grass is grown in the rich soils of ancient sea bed in Utah's West Desert full of rare trace minerals and nutrients. Using a unique freeze-drying method called BioActiveDehydration™, we retain the natural qualities fresh juice and when reconstituted in water the juice is virtually identical to high-squeezed juice with essentially no degradation of color, flavor, aroma, enzymes, and nutrition.*

Wheat grass contains high concentrations of valuable nutrients, including chlorophyll, vitamins, minerals and natural enzymes. This juice powder is 100% pure and contains no insoluble fibers, colors or additives. This high purity makes it more soluble in water and ideal for use in a variety of drink mixes.*

One half scoop (1.2-g) is equivalent to a one-ounce shot of fresh wheat grass juice. And water turns product into the juice of the wheat grass, ten times more potent than the wheat grass itself.
