Fish Oil	1200mg
Omega 3 Fatty Acids (EPA/DHA and other Omega 3)	350mg

* Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established.

OTHER INGREDIENTS: Gelatin, Glycerin, Purified Water, Lecithin, Yellow Beeswax, Silicon Dioxide, Natural Caramel Color.

Suggested Use: For the first 3 days, take 1 softgel with a glass of water anytime from 1 hour to right before lunch and dinner. After 3 days, take 2 softgels with a glass of water anytime from 1 hour to right before lunch and dinner. If you forget to take Glucocil before a meal, feel free to take it with that meal.

No Artificial Flavors or Preservatives
No Dairy, Egg, Gluten, Sodium, Starch, Stimulants, Sugar, or Yeast

The fish oil in Glucocil comes from deep ocean waters (anchovy, herring, salmon, and sprat) and is molecularly distilled for maximum purity, potency, and reduced fish odor.

Store in a cool, dry place, out of reach of children. Do not use if seal under cap is broken or missing.

Caution: Not recommended for those who are under 18, who are pregnant or nursing, or who have kidney or liver problems.

GlucocilTM

The All-Day Glucose StabilizerTM

- ✓ Stabilizes Fasting & Post-Meal Blood Sugar Levels*
- ✓ Reduces Absorption of Sugars & Other Carbohydrates*
- ✓ Promotes Healthy Insulin Sensitivity & Production*
- ✓ Promotes Heart, Blood Vessel & Nerve Health*
- ✓ Contributes to Weight Management*

CLINICALLY RESEARCHED INGREDIENTS

Dietary Supplement
120 Easy-to-Swallow Softgels
Formulated for Efficient Absorption

Glucose Control Essential #2: Reduce Production of Glucose

Your liver makes glucose for energy, and your body tells it when to do so. If the liver can't properly read and respond to the body's signals—due to suboptimal health or aging—it produces more glucose than necessary and leads to excessive glucose build up in the bloodstream. But Glucocil helps reduce the liver's overproduction of glucose.

Glucose Control Essential #3: Increase Insulin Sensitivity

Insulin controls blood sugar levels by instructing cells to uptake glucose. When cells are sensitive to insulin, glucose uptake is normal. When they become insensitive to insulin, excessive glucose builds up in the bloodstream. Glucocil ingredients help activate cells' insulin receptors and increase insulin sensitivity.

Promote Healthy Insulin Production

For people with blood sugar concerns, insulin production is often suboptimal. Clinical research demonstrates that a key ingredient in Glucocil helps promote and maintain healthy insulin production.

Promote Heart, Blood Vessel & Nerve Health

Glucocil contains cardiovascular protective and nerve health promoting ingredients that work hard to support your heart, blood vessels, and nerves, very important to anyone concerned about their blood sugar.

Contribute to Weight Management

Because body weight has a major impact on your blood sugar levels, Glucocil is formulated to help with weight management, too. When fewer carbohydrates are absorbed, fewer calories are absorbed. And slower absorption of the remaining carbohydrates leads to a feeling of more fullness, which helps maintain a healthy diet plan.

Stabilize Blood Sugar Levels All Day

If you want to maintain healthy blood sugar (glucose) levels, proper diet and exercise are the first steps on your path to getting control. And if you want to add a natural approach to maintaining normal blood sugar levels sunup to sundown, that's where Glucocil can help.

Support the 3 Essentials of Glucose Control

Glucocil is a clinically researched natural supplement created after 7 years of research and development. Glucocil supports the 3 essentials of your body's glucose management system, helping you maintain healthy fasting and post-meal blood sugar levels all day.

Glucose Control Essential #1: Reduce Absorption of Sugars and Other Carbohydrates

Ingesting sugar and other carbohydrates elevates your blood glucose levels, but the proprietary mulberry leaf extract in Glucocil gently and effectively reduces carbohydrate absorption. As a result, Glucocil lowers peak post-meal elevations by up to 44% and maintains healthier blood sugar levels between meals.

Proprietary Glucocil Mulberry Leaf Extract Lowers Post-Meal Blood Sugar Spikes (A) and Keeps Blood Glucose Levels From Becoming Too Low (B)
