Fibrin is a protein found in the blood. Maintaining healthy levels of fibrin promotes healthy coagulation of blood for an optimally functioning cardiovascular system.*

Natto-K™ contains specialized blends of enzymes including Nattokinase with NSK-SD® — the only form of nattokinase that does not contain vitamin K2 — to enhance the body's production of plasmin.* Plasmin breaks down excess fibrin, which may improve circulation.*

Natto-K may help maintain already healthy levels of blood clotting factors within a healthy range.*

Recommended Use: 1 capsule three times daily on an empty stomach, one hour before or two hours after a meal.

Caution: Consult physician prior to use if pregnant or nursing, taking medications or have a medical condition.

Thera-blend™ is an exclusive process that combines multiple strains of enzymes that work in specific pH levels, resulting in superior performance in the body.
