Vitamin D Supplement Drops

The American Academy of Pediatrics (AAP) recommends using a vitamin D supplement for exclusively and partially breastfed babies because of low average levels of vitamin D in breast milk.

Vitamin D Supplement Drops (1 mL dose) meets the 400 IU of vitamin D recommended by the AAP for all breastfed infants.

- Vitamin D Supplement Drops provides an essential vitamin that helps your baby's body absorb calcium for strong bones and teeth.*
- Vitamin D Supplement Drops complements your breast milk to help provide optimal nutrition for your baby.*
- Vitamin D Supplement Drops is sugar-free, gluten-free, and lactose-free.

Dosage and Administration

Administer 1.0 mL, or as prescribed, using the dropper provided. Fill the dropper to the line (1.0 mL). Dispense with a single squeeze of the dropper bulb. The full prescribe daily dose will be given. Use full dosage, regardless of age or weight, unless your child's

doctor recommends a different dosage. It is normal for a small amount to remain in the tip of the dropper. May be dropped directly into the mouth or also be mixed with breast milk, formula, cereal or other foods. Use full dosage.

How Supplied

Vitamin D supplement Drops are available in 50 mL bottle with accompanying calibrated dropper.

Recommended Storage

Refrigeration not required. After opening, store away from direct light.
