Friendly *Bifidobacteria* concentration decreases with age

Bifidobacteria are the predominant friendly bacteria inside the colon. Around age 50, the concentration of *Bifidobacteria* starts declining, which may affect natural flora balance between all bacteria species.

CVS Health™ Adult 50+ Probiotic is a high-potency multi-strain probiotic. It contains 10 different natural strains of friendly bacteria including 3 different types of *Bifidobacteria* and, when taken daily, helps maintain healthy flora balance inside the entire intestinal tract.*

Directions: Adults 50 years old and over: As a dietary supplement for intestinal microflora balance, take one (1) capsule daily at mealtime.

KEEP OUT OF REACH OF CHILDREN.

STORE at 72°F or cooler. Do not
expose to excessive heat or moisture.
Do not use if seal is broken.
No refrigeration needed.
