

PNV DHA

Rx Only Dietary Supplement

DESCRIPTION: PNV-DHA is a prescription prenatal/postnatal multivitamin/mineral/essential fatty acid softgel. Each softgel is cobalt blue in color, opaque, and imprinted with "BP321" on one side and blank on the other. PNV-DHA can also be beneficial in improving the nutritional status of women prior to conception.

Supplement Facts

Serving Size: 1 Softgel

Amount per Serving:	% Daily Value	% Daily Value for Pregnant & Lactating Women	
Vitamin C (as ascorbic acid)	85 mg	142%	142%

Iron (as ferrous fumarate)	27 mg	150%	150%
Magnesium (as magnesium oxide)	45 mg	11%	10%
Docosahexaenoic Acid (DHA from omega-3 fatty acids)	300 mg	†	†

† Daily Value (DV) not established.

PNV-DHA contains fish oil and soy.

OTHER INGREDIENTS: Bovine Gelatin, Glycerin, White Beeswax, Vegetable Shortening, Soy Lecithin, Purified Water, FD&C Blue No. 1, Titanium Dioxide, and FD&C Red No. 3.

INDICATIONS: PNV-DHA is a multivitamin/multimineral fatty acid dietary supplement indicated for use in improving the nutritional status of women throughout pregnancy and in the postnatal period for both lactating and nonlactating mothers.

CONTRAINDICATIONS: PNV-DHA is contraindicated in patients with a known hypersensitivity to any of the ingredients.

WARNING: Ingestion of more than 3 grams of omega-3 fatty acids (such as DHA) per day has been shown to have potential antithrombotic effects, including an increased bleeding time and International Normalized Ratio (INR). Administration of omega-3 fatty acids should be avoided in patients taking anticoagulants and in those known to have an inherited or acquired predisposition to bleeding.

PRECAUTIONS: Folic acid alone is improper therapy in the treatment of pernicious anemia and other megaloblastic anemias where Vitamin B12 is deficient. Folic acid in doses above 1.0 mg daily may obscure pernicious anemia in that hematologic remission can occur while neurological manifestations progress.

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.

ADVERSE REACTIONS: Allergic sensitization has been reported following both oral and parenteral administration of folic acid.

DOSAGE AND ADMINISTRATION: Before, during and/or after pregnancy, one softgel daily or as directed by a physician.

HOW SUPPLIED: Bottles of 30 softgels (42192-321-30). The listed product number is not a National Drug Code. Instead, Acella Pharmaceuticals has assigned a product code formatted according to standard industry practice to meet the formatting requirements of pharmacy and healthcare insurance computer systems.

STORAGE: Store at 20° - 25°C (68° - 77°F); excursions permitted to 15° - 30°C (59° - 86°F). [See USP Controlled Room Temperature.]

KEEP THIS AND ALL MEDICATIONS OUT OF THE REACH OF CHILDREN.
