

Futurebiotics Longest Living Acidophilus+ contains a unique blend of lactobacilli strains, including potent Lactospore®. Delivering viable live probiotics to the intestinal tract is a formidable technical challenge. Lactospore® is a naturally microencapsulated sporiferous preparation of Lactobacillus sporogenes that is proven to deliver viable lactobacilli to the intestine. It is room-temperature stable and highly resistant to the action of heat, gastric acids and bile. Three additional, effective lactobacilli strains are included, which together with Lactospore®, provides over 1.5 billion organisms per capsule and supports healthy intestinal flora balance.*

** Potency of product at time of manufacture.

May be refrigerated if desired.
