

Why Organic Whole Food Complexes?

Our bodies understand - and seek - organic nourishment, for organic whole foods deliver the ideal form of essential micronutrients that allow us to thrive. Our Earth understands - and celebrates - organic cultivation, which reduces the burden of the toxic "ides" - pesticides, fungicides, and herbicides. And our organic whole food vitamins understand and speak your language - the language of life itself.

New Chapter will donate a portion of the net proceeds from this product to **The Organic Center**, whose mission is to generate credible information and communicate the universal benefits of organic farming and products. ◇ **Probiotic Nutrients™**, exclusively from *New Chapter*, are created by the two-stage culturing activity of organic *Saccharomyces cerevisiae* and three species of *Lactobacillus*: *acidophilus*, *bifidus*, and *rhamnosus*. These beneficial probiotics culture the CoQ10, organic milled soy, and food concentrates, creating 100% whole-food complexed nutrients that are remarkably easy to digest and utilize, while simultaneously offering naturally occurring phytonutrients such as soy isoflavones, beta glucans, bioflavonoids, glutathione, lipoic acid, and enzymes.
