### **OUR SOILS WERE NOT ALWAYS** DEFICIENT IN MINERALS

When dinosaurs were here 70 million years ago, they were probably roaming an earth abundant with at least 84 minerals in the soil A time when plants and fruits likely contained at least 77 minerals which became water-soluble as they transmuted through the root system to become part of a luscious, succulent, vibrant, life-sustaining food. Plant derived minerals have been encapsulated in the earth as a pure food since that time. Each quart of Plant Derived Minerals  $^{\rm TM}$ contains a natural assortment of plant derived minerals which range from A to Z on the mineral list. These minerals are leached from ancient humic shale mined from Southern Utah.

### WARNING:

If you are pregnant, nursing or taking medications, consult with you healthcare professional before using this product.

KEEP OUT OF REACH OF CHILDREN.

Manufactured in the U.S.A.
