

Phytosome™ technology, which combines one part standardized ginkgo extract with two parts phosphatidylcholine, dramatically improves absorption, as compared to non-Phytosome products.* In addition to this exceptional absorption and delivery to targeted sites, studies indicate Ginkgo increases the antioxidant activity of the brain compared to non-Phytosome ginkgo.*

This formula was developed in accordance with the safety and efficacy standards set forth by the German Commission E, which is the worldwide recognized authority for effective herbal remedies.
