

Fast Absorbing, High-Potency Joint Complex
InnoFlex was designed to be a fast absorbing, high-potency joint complex capable of supporting your joints, whether you swim, run, occasionally lift weights, bodybuild, or practice yoga. InnoFlex provides joint strength, joint tissues and improve flexibility.

Collagen Production Decreases Significantly with Age
Collagen is the source of a number of serious health issues. Research shows healthy collagen can be maintained through supplementation and healthy diet habits.

Key Structural Components Play an Important Role in Cartilage Upkeep
Glycosaminoglycans are amino sugar that is used for healthy joint structures. Chondroitin is naturally found in cartilage, tendons, and ligaments where it binds to proteins like collagen and hyaluronic acid. It is one of the major building blocks of glycosaminoglycans. Glycosaminoglycans are the structural components in cartilage that play an important role in the maintenance of joint cartilage.

- SUPPORT HEALTHY JOINTS & CARTILAGE
- PROMOTE LUBRICATION FOR JOINT COMFORT
- STIMULATE THE SYNTHESIS OF HYALURONIC ACID, IMPORTANT FOR TISSUE GROWTH, REGENERATION & HEALING

EASILY ABSORBED DUE TO HIGH BIOAVAILABILITY

The amino acid L-Proline is the only precursor to hydroxyproline, an essential component in the production of collagen. Collagen is the 'cement' which holds together the skin, cartilage, ligaments, tendons, and arteries. Vitamin C and the amino acids L-Proline and L-Lysine are essential for the formation of healthy collagen and cartilage. These nutrients help maintain the flexibility of muscles and joints.
