BrainSustain™ represents more than 30 years of neuroscience research. Designed to address brain health, structure, and function, BrainSustain contains a variety of nutrients and cofactors that support mitochondrial energy production, antioxidant systems, neurotransmitter production, and cell membrane integrity.*

BrainSustain features 50 mg of EVNol™ in every serving. EVNol is a patented full-spectrum, pure d-mixed-tocotrienols complex derived from red palm oil—a scientifically validated source. It provides all four tocotrienol isomers (alpha, beta, gamma, and delta) in natural ratios. Tocotrienols offer extraordinary protective benefits to brain cells (e.g., white matter) and neurons, and higher serum levels of tocotrienols are associated with cognitive health. This brain health formula also features VegaPro™, XYMOGEN's proprietary pea/rice protein blend; Aminogen®, to facilitate protein absorption; and activated B vitamins, including Quatrefolic® (5-methyltetrahydrofolate or 5-MTHF).*

Two scoops of BrainSustain powder provide the same amount of N-acetyl-L-cysteine, phosphatidylserine, acetyl-L-carnitine, alpha-lipoic acid, coenzyme Q10, and glucoraphanin (TrueBroc®) as eight capsules of XYMOGEN's NeuroActives™ BrainSustain™.
