

Stress wreaks havoc on our bodies. Whether it's a result of mental stress or physical exercise, stress takes its toll over time. Phosphatidylserine, an important nutrient found throughout the body, provides nutritional support to combat stress.[†]

Because this nutrient's production decreases with age, a phosphatidylserine supplement is ideal to help revitalize the brain's anti-stress mechanism. Our phosphatidylserine comes from soy and also contains naturally occurring phosphatidylcholine, phosphatidylethanolamine and phosphatidylinositol.[†]
