SynovX® Metabolic is a cutting-edge option for those in need of joint support related to excess body fat. Exciting, new research shows that fat cells send messages (via leptin and other signaling molecules) to joint tissue cells. These messages can trigger a cascade of events that damage the health and integrity of joints. SynovX Metabolic works by changing the "communication" between these cells, resulting in a more naturally healthy joint environment that can help you stay comfortable and be active.*
