AURUM OIL® - Something smells fishy about using Krill to get your Omega oils. Do you hate whales?! Do you want to bring about the end of the world? Well apparently so because people have been duped into buying fish and krill omega oils instead of the superior plant based omegas. We are royally stuffing up the planet; go google "Krill Oil Shortage" and see what pops up. Humans have survived for millennia without necessarily getting omegas from fish (and certainly not Krill. Our ancestors ate healthy fresh plants full of deliciously clean, fresh plant oils packed with all the omegas humans need. No longer will inelly fishmongers hold our health to ransom by peddling their unscrupulous world endangering, whale hating lies. For the record - Plant matter can supply essential fatty acid omega 3, 5, 6, 7, 9, CLA (conjugated linoleic acid), CLnA (conjugated linolenic acid) and essential oils to preserve and enhance.

Keep in a cool dry place away from direct sunlight and store below 30°C. Some ingredients may contain traces of wheat, eggs, soy or nuts.
