

MULTIFOOD® by ATP Science: Multifood is made from real food and not synthetic vitamins, which may be made from genetically modified bacteria. Using vitamins the way nature intended provides a more balanced form of not only vitamins and minerals, but all of the associated nutrients, such as the polyphenols and other natural compounds that may help the body process and absorb them more effectively.

Multifood delivers important micronutrients from real food sources. A very simple concept that could benefit many, but is often used by only those in the know. It is a combination of foods that have been grown really well by some very clever farmers, processed to preserve nutrients, tested to make sure it contains the nutrients and then put into a capsule or powder dietary supplement to make it easier for you to measure and take.

DIRECTIONS FOR USE: Take 2 capsules daily with food. Capsules can be opened and sprinkled onto food or added to juice or smoothies as desired.
