To assure optimal extraction of Mistletoe's bioactive compounds, the plants are hand-harvested only in the winter and are then taken directly to the laboratory and promptly extracted while still fresh and succulent.

We prepare our Mistletoe Extract from fresh (undried) whole *Viscum album* plants which are Custom Wildcrafted™ in their natural wild habitat.

LIQUID HERBAL EXTRACT

MISTLETOE

Viscum album

Fresh Whole Herb

HERBAL SUPPLEMENT

4 fluid ounces (118.4 ml)
