

Directions: Monolaurin is a supplement derived from lauric acid and glycerin, and is a byproduct of coconut fat. Lauric acid is one of the compounds found in high amounts in coconut oil and is converted by the body into Monolaurin. This process is inefficient so a large amount of coconut oil would need to be ingested to get an adequate dosage of Monolaurin. Monolaurin is commonly used for its ability to support digestive and immune system health.*

Suggested Use: As a dietary supplement take 2 capsules one to three times per day with food.

Storage: Store in a cool, dark place. Do not freeze or expose to moisture or heat above room temperature.
