ACTIVE HEXOSE CORRELATED COMPOUND

Active Hexose Correlated Compound is a fermented mushroom extract known for its immunostimulatory effect. It increases the activity of T-cell and natural killer (NK) cells, some of the body's first-line of defenses. As one of the most researched immune supplements, it is used by thousands of people across the globe.*

FRESH NUTRITION

Our goal is to create high-quality natural products using both organic and responsibly sourced ingredients to optimize health and well-being.
