

NMN

NICOTINAMIDE MONONUCLEOTIDE

250 mg per serving

60 Capsules Dietary Supplement

- * Supports Healthy Aging and NAD+ Production
- * Supports Energy Metabolism and Healthy Brain Function

Nicotinamide Mononucleotide (NMN) is a direct precursor to NAD+ that may be more bioavailable than NAD+ on its own. NAD+ levels decrease as one ages and may lead to lower energy levels, weight gain, DNA breakdown, as well as other signs of aging. Supplementing with NMN supports longevity by boosting NAD+ levels.*

Suggested Use: As a supplement, take 2-8 capsules per day. It can be taken in the morning or at night, with or without food. Taking a smaller dose multiple times a day is most effective. Do not exceed 8 capsules per day.

Storage: Store in a cool, dark place. Do not freeze or expose to moisture or heat above room temperature.

WARNING: Consult your physician before use if you are taking any medications. Do not use NMN if you are pregnant, nursing, or under 18 years of age. Discontinue use and consult your doctor immediately if any adverse reactions occur. Do not take NMN and operate heavy machinery. Keep out of reach of children. Do not exceed 8 capsules per day.
