

Hawthorn berries are a rich source of bioflavonoids, which support vitamin C activity. Hawthorn has a positive effect on the cardiovascular system by supporting circulation and by providing antioxidant protection to combat free radicals.[†]

Ultimate Extract® Hawthorn contains Hawthorn berry (*Crataegus pinatifida*) extract powder from the highest grade whole fruit.

The Ultimate Extract® process makes our Hawthorn more available than plain herb powder. By combining the extract with the marc (insoluble herb material remaining after extraction), all beneficial components found in nature are preserved full spectrum to deliver optimal bioavailability.
