Microcrystalline calcium hydroxyapatite is the most bone ready calcium source known. It is produced by a unique process that preserves the original microcrystalline matrix of living bone.* In addition to calcium, it contains matrixed nutrients as they naturally occur in bone, including phosphorus, magnesium, zinc, manganese, trace minerals and protein.* Calcium citrate is a superior form of calcium, naturally acidified for optimal utilization by the body.*

Keep in a cool, dry place and out of reach of children.
