

EVIDENCE-BASED

Resveratrol Ultra High Potency provides 100% pure trans-resveratrol, derived from a specialized extraction and purification method. This soy-free formula contains rutin (quercetin rutinoside), a potent bioflavonoid from Japanese sophora, that possesses free-radical scavenging activity.* Research suggests that resveratrol and quercetin work synergistically to provide more anti-aging and immune support than resveratrol alone.*

One Resveratrol Ultra High Potency softgel contains as much trans-resveratrol as 600 glasses of red wine.†

†Based on 175 mg trans-resveratrol dose, an average of 1.97 mL of trans-resveratrol per liter of red wine, and 5 oz glass size.
