

The Ultimate Flora Probiotic Difference

Higher Culture Count

Ultimate Flora CRITICAL COLON 80 Billion is a maximum-strength probiotic for people with digestive discomfort. Each capsule contains 80 billion live cultures of 14 strains of beneficial flora.*

One Capsule Per Day

= 80 BILLION

Why take 8 or more capsules of another probiotic when just one Ultimate Flora Critical Colon probiotic capsule equals 80 billion live cultures!

Delayed Release Capsule

Stomach acid can destroy probiotics. Ultimate Flora delayed-release capsules are designed to resist stomach acid more than standard capsules.

Superior Health Begins in the Digestive System

WHAT ARE PROBIOTICS?

Probiotics are beneficial bacteria that live in the intestines. Lactobacilli probiotics are most prevalent in the small intestine and Bifidobacteria probiotics are most prevalent in the large intestine (or colon). The average intestinal tract contains more Bifidobacteria than Lactobacilli.

HOW IS ULTIMATE FLORA DIFFERENT?

Ultimate Flora CRITICAL COLON contains 14 strains of beneficial probiotics working differently to help optimize your digestive health. Some other brands contain only Bifido or only Lacto. Since you have many different strains of probiotics in your intestinal tract, more strains (B's and L's) may be better.*

WHY TAKE ULTIMATE FLORA?

As we age, our level of Bifidobacteria declines. Ultimate Flora CRITICAL COLON contains 65% Bifido to help maintain a healthy colon environment.*

What to look for in a probiotic supplement:

- ✓ At least 10 probiotic strains
- ✓ High culture count with Bifidobacteria & Lactobacilli strains (B's and L's)
- ✓ Delayed release capsule
- ✓ Potency until time of consumption†

Brenda Watson is a leading expert on natural digestive care. Her Ultimate Flora probiotics are formulated to help balance the digestive system, and promote regularity and vibrant health.
